Network Change:

Retirement of a segment of copper cable feeding DA 630101. This lateral on a rural pole lead is on Hwy 193, Located between Hwy 49 and Chili Bar Lane in the Placerville PLVLCA11 serving wire center. Replacement of this pole lead has been deemed unsafe by Cal Trans, which has denied AT&T a permit to replace poles and cable along the existing route due to the shifting terrain, erosion, and potential for mudslides on the supporting hillside.

Description of Type of Changes Planned:

Copper cable segment will be retired and, to the extent technically possible, existing services migrated to an existing NGDLC. AT&T has migrated all of the customers to the NGDLC except for a single line.

Description of Reasonably Foreseeable Impact of the Planned Changes:

No copper loops in this area will be available after this pole lead has been removed from service. There are alternatives available for the single line not migrated because of technical limitations.

Location of Change:
